PROFESSIONAL SUMMARY

Data analytics and business systems professional with an MS in Data Science and experience building forecasting models, BigQuery reporting solutions, dashboards, and automation at American Express. Combines financial expertise with hands-on Python, machine learning, NLP, and AI application projects.

TECHNICAL SKILLS

AI and machine learning: OpenAI API, LangChain, NLP, forecasting, scikit-learn, TensorFlow, PyTorch, Hugging Face

Languages and data: Python, SQL, Pandas, BigQuery, Excel, MongoDB

Analytics and visualization: Tableau, Power BI, KPI design, anomaly detection, variance analysis

Application delivery: Streamlit, Docker, Vercel, GitHub, data pipelines, automation

PROFESSIONAL EXPERIENCE

Business Systems Analyst | American Express 2026 to Present

- Build and analyze BigQuery data tables using Python and SQL for card issuance and global billings reporting.
- Connect BigQuery to Tableau Server and build dashboards, KPIs, and reporting views; partner with stakeholders to validate business logic and source data.

Data Analytics Analyst | American Express Jul 2024 to Dec 2025

- Led fraud-related call-volume forecasting across business segments to support workforce planning, using Python, SQL, Excel, and Power BI.
- Analyzed trends and anomalies to explain volume changes; introduced data pipelines and automation to reduce manual reporting and improve turnaround time.

Claims Examiner | American Express 2023 to Jul 2024

- Adjudicated complex claims and used Excel, SQL, and reporting tools to investigate discrepancies, identify trends, and flag anomalies while maintaining accuracy and compliance.

SELECTED AI AND DATA PROJECTS

- **Fraud Transaction Detection:** Built a data pipeline, stored transaction data in SQL, and applied machine learning to predict fraudulent transactions.
- **Review and Recommendation Systems | Metis | 2021 to 2022:** Analyzed 600,000 Airbnb reviews in MongoDB with sentiment analysis and topic modeling; applied NLP to 160,000 patient reviews to recommend five highly reviewed drugs for a selected condition.
- **Rental Price Prediction | Metis | 2021 to 2022:** Scraped 60 days of rental advertisements and used regression models to estimate competitive rental prices.

ADDITIONAL EXPERIENCE

Financial Business Analyst Consultant | Investment With Numbers LLC | 2012 to 2019
Built financial models, variance reports, investment-analysis tools, dashboards, and forecasting support.

Corporate Accountant | The McClatchy Company | Oct 2006 to Jan 2012
Supported consolidated reporting, reconciliations, compliance, and automated budget and variance reporting.

EDUCATION

MS in Data Science, GPA 3.9 | Eastern University | 2023 to 2024
Data Science and Machine Learning Bootcamp | Metis | 2021 to 2022
Computer Science Coursework | Sierra College | 2019 to 2022
BS in Accounting | California State University Sacramento | 2006
