Asteway Kebede

APPLIED AI | AI-ENABLED ANALYTICS | DECISION SUPPORT

Phoenix, Arizona | kastewayk@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL PROFILE

Applied AI and analytics professional with an MS in Data Science who builds AI-enabled decision-support tools on trusted data foundations. At American Express, combines Python, SQL, BigQuery, structured JSON, custom GPT capabilities, and Copilot agents to help teams explore scorecards, diagnose performance drivers, and consume reporting through natural language and interactive dashboards.

APPLIED AI AND TECHNICAL CAPABILITIES

Applied AI	AI agents, custom GPTs, Copilot agents, RAG, MCP, tool integration, structured outputs, evaluation
Data and engineering	Python, SQL, BigQuery, Pandas, JSON, data pipelines, APIs, GitHub, HTML/CSS/JavaScript
Analytics and BI	Diagnostic analytics, KPI design, forecasting, ML, NLP, Tableau, Power BI, Excel, executive reporting

PROFESSIONAL EXPERIENCE

Business Systems Analyst | American Express | *2026 - Present*

- Build a Python and BigQuery analytical workflow that produces daily, weekly, and monthly operational metrics plus structured JSON summaries for Global Card Issuance and Global Billings reporting.
- Create AI-enabled diagnostic experiences through a custom GPT and Copilot agent, allowing an Insights team to explore scorecards, ask natural-language questions, and investigate the dimensions driving metric movement.
- Use the same governed metric layer to generate an interactive HTML dashboard that combines previously separate Tableau views; partner with stakeholders to validate source data, business logic, and operational interpretation.

Data Analytics Analyst | American Express | *Jul 2024 - Dec 2025*

- Led fraud-related call-volume forecasting and variance analysis across business segments using Python, SQL, Excel, machine learning, and Power BI to inform workforce planning; introduced reusable data pipelines and reporting automation.

Claims Examiner | American Express | *2023 - Jul 2024*

- Adjudicated complex claims and used Excel, SQL, and reporting tools to investigate discrepancies, identify patterns, and maintain accuracy within a regulated financial-services environment.

SELECTED APPLIED AI AND DATA PROJECTS

OpsAtlas AI | *Python, RAG, MCP, FastAPI, evaluation* | GitHub

- Built a governed operations-intelligence agent combining deterministic KPI diagnostics, citation-preserving RAG, bounded MCP tools, structured outputs, synthetic data, and evaluation tests.

Flight Operations Intelligence Copilot | *Python, JSON, HTML, diagnostic analytics* | GitHub

- Built an executive system from 697,000 public U.S. DOT flight records; one Python pipeline feeds 10 governed KPIs, regional scorecards, an interactive dashboard, and natural-language diagnostics.

Applied AI Learning Lab | *RAG, MCP, agents, evaluation, governance* | GitHub

- Created a structured field guide with practical examples covering models, context engineering, RAG, MCP, agent workflows, evaluation, security, and production considerations.

EARLIER BUSINESS EXPERIENCE

Financial Business Analyst Consultant | Investment With Numbers LLC | 2012 - 2019 - Financial modeling, variance reporting, dashboards, and forecasting.

Corporate Accountant | The McClatchy Company | 2006 - 2012 - Consolidated reporting, reconciliations, compliance, and Excel automation.

EDUCATION

MS in Data Science, GPA 3.9 | Eastern University | 2023 - 2024

Data Science and Machine Learning Bootcamp | Metis | 2021 - 2022

BS in Accounting | California State University Sacramento | 2006
